

## Information from Schroff GmbH concerning the implementation of legal obligations under the REACH Regulation 1907/2006/EC

We, as a manufacturer and distributor of articles in accordance with the REACH Regulation (case, cabinet and chassis systems for electronics and electrical equipment, power supply units, backplanes, air conditioners, complete solutions and other components for indoor and outdoor applications), are a "downstream user" and are therefore not subject to any obligation to register.

The products you purchase from us are articles in accordance with REACH and for which there is no registration requirement. For this reason we have not registered any chemical substances. Responsibility for the registration of chemical substances lies with the manufacturers of those substances. In your and our own interest we are observing the implementation of REACH and the requirements that arise from it closely. We have agreements with all our suppliers that only products that comply with REACH and RoHS shall be supplied to us. If that conformity cannot be maintained, our suppliers are obliged to notify us immediately.

The ECHA's list of candidates for "substances of very high concern", or **SVHCs**, is regularly checked by us with regard to relevance for our products.

We take our obligation to provide information for our customers in accordance with article 33 of the REACH Regulation very seriously and will of course keep you informed without prompting.

We hope that this letter has explained our implementation of the REACH Regulation in detail and has answered your questions on this matter.

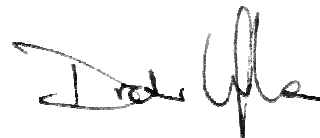

Should you have further questions, however, concerning the implementation of the REACH Regulation in our company, we will be happy to respond at any time. In such cases please contact us via [schroff.de@pentair.com](mailto:schroff.de@pentair.com).
